Serial No. 09/728,653
Art Unit 1653

This application contains sequence disclosures that are encompassed by the definitions for amino acid sequences set forth in 37 CFR 1.821. However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 with regard to the sequence disclosures.

See, for example, the sequences on pages 171, 172, and 173.

Applicant is given the time period set in this letter within which to comply with the sequence rules, 37 CFR 1.821-1.825. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 CFR 1.821(g). Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136. In no case may an applicant extend the period for response beyond the six month statutory period.

*

A restriction is imposed. First, however, the following subgenera are defined:

- G1: at least three of A2, A3, A4, A5, A6 is a group other than a bond;
- G2: at least three of A2, A3, A4, A5, A6 is a covalent bond;
- G3: Q must contain Q1;
- G4: Q is either an amino acid, or $(\text{CHR}^{10})_n\text{Q}^2$.

Restriction to one of the following inventions is required under 35 U.S.C. §121:

1. Claims 1, 8, 9, 12, 19 limited to G1 and G3.
2. Claims 1-6, 8, 12-16, 19 limited to G1 and G4.
3. Claims 1, 8, 9, 12, 19 limited to G2 and G3.
4. Claims 1-6, 8, 12-16, 19 limited to G2 and G4.
5. Claims 17-18, drawn to a method of using the compounds of Group 1.
6. Claims 17-18, drawn to a method of using the compounds of Group 2.
7. Claims 17-18, drawn to a method of using the compounds of Group 3.
8. Claims 17-18, drawn to a method of using the compounds of Group 4.

Neither of claims 10 or 11 is grouped. Claim 10 is dependent on claim 3. Claim 3, in turn, mandates that Q be limited to $(\text{CHR}^{10})\text{Q}^2$. In other words, based upon claim dependence alone, claim 3 precludes the possibility that Q be $(\text{CHR}^{10})\text{Q}^1$. Yet claim 10 defines variable Q^1 without defining variable Q^2 . Thus, it cannot be determined whether applicants intend for claim 10 to permit Q^1 to be present or not. The same situation holds in the case of claim 11, although claim 11 is improperly dependent for each of two separate reasons, the second reason being that it permits variable R^{10} to be hydrogen. In the event that claims 10 and 11 are amended so that their claim dependence is proper, these claims will be grouped accordingly. Claim 20 is not grouped because it is drawn

to a "use". Claim 7 is also not grouped. In the event that applicants elect one of Groups 1-4, claim 7 will be joined with that group.

The claimed inventions are distinct.

Inventions {1-4} and {5-8} are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP 806.05(h)). However, in the event that any of Groups 1-4 is elected, and claims therein found allowable, the corresponding method-of-use claims will be rejoined for further examination.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

. . . .

In addition to the foregoing, applicants are required under 35 U.S.C. §121 to elect a disclosed specie for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. A "specie" is a specific compound, with all substituent variables and integer variables fully accounted for.

- 5 -

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a generic claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentable distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. §103 of the other invention.
